**FACILITY LOCATION:** 21255 LA HIGHWAY 1  
PLAQUEMINE, LOUISIANA, 70765

This permit is issued by the Louisiana Department of Environmental Quality (LDEQ) under the authority of the Louisiana Hazardous Waste Control Law R.S. 30:2171 et seq., and the regulations adopted thereunder and under the authority of the 1984 Hazardous and Solid Waste Amendments (HSWA) to the Resource Conservation and Recovery Act (RCRA) to The Dow Chemical Company, Louisiana Operations, (hereafter called the Permittee), to operate a hazardous waste Treatment, Storage, and Disposal facility (TSD), at latitude 30° 19' 11" and longitude 91° 14' 8."

For the purposes of this permit, the "Administrative Authority" shall be the Secretary of the Louisiana Department of Environmental Quality, or his/her designee.

The Permittee must comply with all terms and conditions of this permit. This permit consists of the conditions contained herein and the applicable regulations contained in the Louisiana Administrative Code, Title 33, Part V, Subpart 1, (LAC 33:V.Subpart 1). Applicable regulations are those that are in effect on the effective date of issuance of this permit.

This permit is based on the assumption that the information provided to LDEQ by the Permittee is accurate. Further, this permit is based in part on the provisions of Sections 206, 212, and 224 of the HSWA of 1984, which modify Section 3004 and 3005 of RCRA. In particular, Section 206 requires corrective action for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage or disposal facility seeking a permit, regardless of the time at which waste was placed in such unit.

Section 212 provides authority to review and modify the permit at any time. Any inaccuracies found in the submitted information may be grounds for the termination, modification, revocation, and reissuance of this permit (see LAC 33:V.323) and potential enforcement action. The Permittee must inform the LDEQ of any deviation from or changes in the information in the application that would affect the Permittee's ability to comply with the applicable regulations or permit conditions.

This permit shall be effective as of May 9, 2009, and shall remain in effect until May 9, 2019, unless revoked, reissued, modified or terminated in accordance with LAC 33:V.323 and 705 of the Louisiana Hazardous Waste Regulations. The Administrative Authority may issue any permit for a duration that is less than the maximum term of ten (10) years and the term shall not be extended beyond the maximum duration by modification in accordance with LAC 33:V.315.

Post-closure requirements of LAC 33:V. Chapter 35, Subchapter B must continue for at least thirty (30) years after the date of closure for the land disposal units listed in Tables IV-D and IV-E of this permit. Expiration of this permit does not relieve the Permittee of the responsibility to reapply for a permit for the remainder of the thirty (30) year post-closure care period.

Provisions of this permit may be appealed in writing pursuant to La. R.S. 30:2024(A) within thirty (30) days from receipt of the permit. Only those provisions specifically appealed will be suspended by a request for hearing, unless the Secretary elects to suspend other provisions as well. A request for hearing must be sent to the following:

Louisiana Department of Environmental Quality  
Office of the Secretary  
Attention: Hearings Clerk, Legal Services Division

**PUBLIC NOTICE**  
**LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY (LDEQ)**  
**THE DOW CHEMICAL COMPANY - LOUISIANA OPERATIONS**  
**FINAL HAZARDOUS WASTE OPERATING RENEWAL PERMIT**

The LDEQ, Office of Environmental Services, has made the decision to issue the final hazardous waste operating renewal permit for The Dow Chemical Company - Louisiana Operations (Dow), P.O. Box 150, Plaquemine, Louisiana 70765 for the Plaquemine Facility. **The facility is located at 21255 LA Highway 1, Plaquemine, Iberville Parish.**

Under this final hazardous waste operating renewal permit, Dow will renew its hazardous waste operating permit governing the operation of: thirteen (13) hazardous waste tanks; five (5) container storage areas; six (6) hazardous waste thermal treatment units; one (1) operational hazardous waste land disposal unit; and one (1) post-closure hazardous waste land disposal unit/corrective action management unit at its Plaquemine Facility. Dow's Plaquemine Facility generates hazardous wastes incidental to its chemical manufacturing operations. After generation, all of Dow's hazardous wastes are stored onsite before ultimate onsite or offsite treatment or disposal. Under the final hazardous waste operating renewal permit, the receipt, storage, treatment, and/or disposal of offsite generated hazardous wastes is prohibited.

Dow's Plaquemine Facility manufactures both organic and inorganic compounds such as: sodium hydroxide, chlorine, ethylene, propylene, polyethylene, vinyl chloride monomer (VCM), benzene, ethylene oxide, propylene oxide, glycol, glycol ethers, substituted cellulose, and various chlorinated hydrocarbon products. Dow's multiple chemical production processes generate various hazardous wastes incidental to process operations. Dow's thirteen (13) hazardous waste tanks are utilized for the storage of numerous onsite generated hazardous wastes. Most generated liquid hazardous waste streams are treated onsite in Dow's six (6) RCRA permitted thermal treatment units. Ash and residues generated by the combustion of hazardous wastes in the thermal treatment units are classified as hazardous waste. Ash and residues removed from the thermal treatment units are disposed of in the permitted Block 80 hazardous waste landfill.

The final hazardous waste operating renewal permit also includes permit conditions governing Dow's groundwater protection and monitoring programs for two (2) permitted land disposal units: the active Block 80 hazardous waste landfill and the closed Northwest Landfill/Corrective Action Management Unit (NWLFC/CAMU). The NWLFC/CAMU was previously permitted under a hazardous waste CAMU permit (LAD008187080-CAMU-1). The CAMU permit will be terminated once the final hazardous waste operating renewal permit becomes effective.

The final permitting action and related documents are available for review and copying (all documents copied will be subject to a \$0.25 charge per copied page) at the LDEQ, Public Records Center, Room 127, 602 North 5th Street, Baton Rouge, LA. Viewing hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays). **The available information can also be accessed electronically on the Electronic Document Management System (EDMS) on the DEQ public website at [www.deq.louisiana.gov](http://www.deq.louisiana.gov).**

Additional copies of the final hazardous waste operating renewal permit may be reviewed at the Iberville Parish Library, Headquarters, 24605 J. Gerald Berret Blvd., Plaquemine, Louisiana 70764-0736 and the West Baton Rouge Parish Library, 830 North Alexander, Port Allen, Louisiana 70767-2327.

In accordance with Louisiana Revised Statutes (La R.S.) 30:2024, the Permittee may file with the secretary a request for a hearing no later than thirty (30) days after the notice of the action is served. Under La. R.S. 30:2050.21, any person aggrieved by a final permit action may appeal to the Nineteenth Judicial District Court within 30 days after the notice of the action has been given.

Previous notices have been published in the The Advocate, The West Side Journal and in the Plaquemine Post South on January 13, 2000, July 24, 2008 and September 25, 2008 in The Advocate and The Plaquemine Post South and on October 2, 2008 in The West Side Journal..

Inquiries or requests for additional information regarding this permit action, should be directed to Mr. Keith R. Williams, LDEQ, Waste Permits Division, P.O. Box 4313, Baton Rouge, LA 70821-4313, phone (225) 219-3011.

Persons wishing to be included on the LDEQ permit public notice mailing list or for other public participation related questions should contact the Public Participation Group in writing at LDEQ, P.O. Box 4313, Baton Rouge, LA 70821-4313, by email at [deqmaillistrequest@la.gov](mailto:deqmaillistrequest@la.gov) or contact the LDEQ Customer Service Center at (225) 219-LDEQ (219-5337).
